

Genuine Vegetable Parchment manufacturing process

Step 1: Making Waterleaf

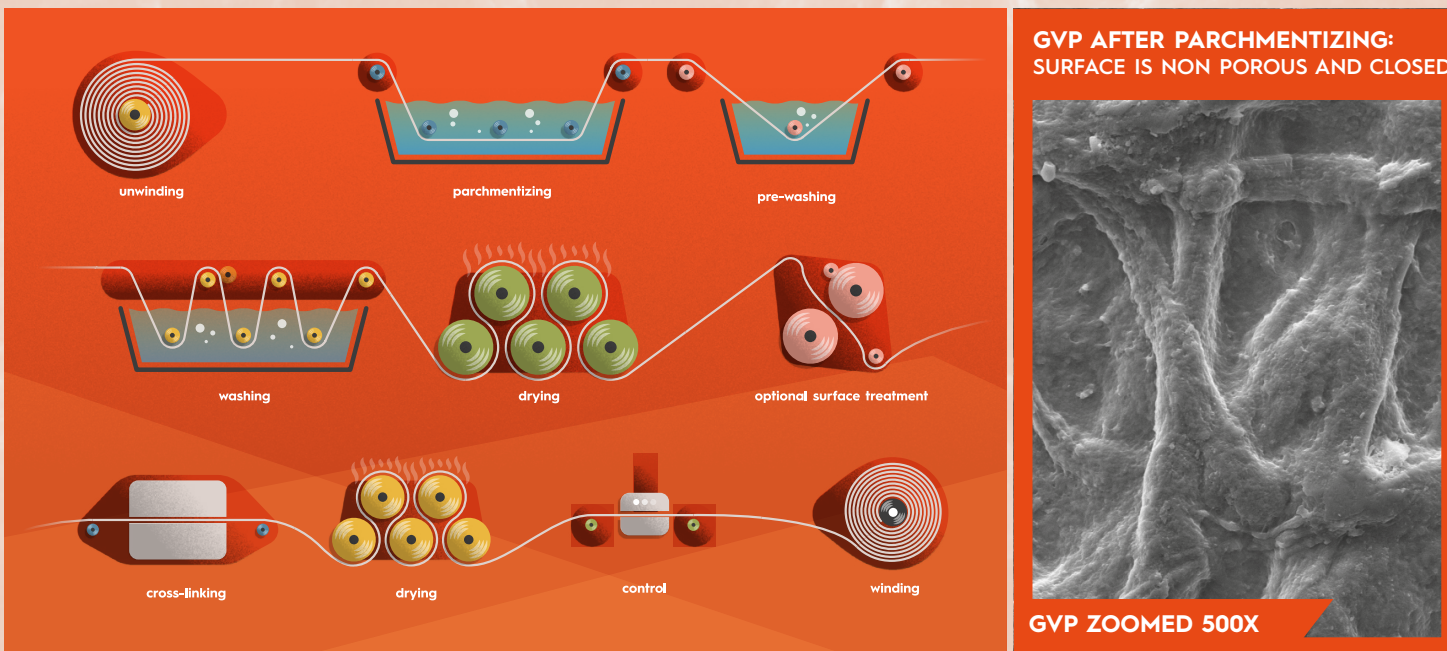

What is Genuine Vegetable Parchment?

Genuine Vegetable Parchment (GVP) is a smart cellulose based composite that looks like paper.

The proprietary two-step process starts with making the waterleaf; which is then parchmented to create the many unique properties.

Step 2: From Paper to Parchment

Unique parchment characteristics

- 100% cellulose
- Absolute grease barrier
- Wet strength
- Temperature resistance (up to 428F°)
- High mechanical strength
- Clean, no loose fibers
- Biodegradable, compostable

**No additives or chemicals
in the final product**
